

Date: 8/6/2015

Edition: 15-16

Addition of Metric Micro-MVS Drills

Available in 2xD, 7xD, 12xD, 20xD, 25xD & 30xD

Technical Information:

- Drill sizes available from \varnothing 1mm to \varnothing 2.9mm in 0.1mm increments
- New straight cutting edge
- New flute geometry
- Double margin
- New PVD coated DP1020 grade

Applications to Target:

- All materials including steels, stainless steels, cast iron, aluminum, heat resistant alloys and hardened steels

Benefits:

- New straight cutting edge provides excellent cutting edge strength
- New flute geometry ensures good drill rigidity and chip evacuation
- Double margin improves stability and accuracy in deep hole drilling
- New PVD coated grade (DP1020) offers longer tool life in a wide range of materials

Competitors to Target:

- All competitors that offer small diameter drilling, under 3mm, in short and deep hole applications
